

The Daily Courier

VOL. 6, NO. 51.

CONNELLVILLE, PA., THURSDAY EVENING, JANUARY 9, 1936.

PRICE, ONE CENT.

LOTS MORE TROUBLE COMING TO FATED KING BEE SHOW.

Manager Gramlich Has Typewriter and Baggage Attached for Board and Moves to New Haven.

THE COMPANY SCRIPPLES.

Manager Promised Transportation Home for the Chorus Girls—They Were Willing but When Train Time Came No Tickets Were in Sight.

"How doth the busy, little bee improve each shining hour," runs the proverbial according to Proprietor William G. Gramlich of the Trans-Allegheny Hotel the busy bees of the "King Bee" company, who have returned to Connellville to stand on the theatrical shows again, are only sitting there big heads a day with no prospects of work.

As a consequence Mr. Gramlich made arrangements with Manager Charles Gramlich of the company to get transportation home for his broilers. Gramlich agreed and so did the girls. When the time came to produce the transportation, it is said that Gramlich refused. Likewise did he get angry at Gould Mr. Marqua. He threatened to leave. In fact, he did leave, but not until Marqua routed Squire Frank Miller out of bed at midnight to issue an execution on Gramlich's baggage.

Today Mr. Gramlich is located in a New Haven hotel while Proprietor Marqua is holding his typewriter and a small amount of baggage until the word bill is settled. At the same time the show girls are scripples and are hoping things will develop and permit their return home.

Early in December the King Bee company had a squabble within itself which resulted in midnight hearings, heated shouting and other unpleasantness, but soon the company left on an extended tour only to return in Connellville a few days ago.

The King Bee, (big pardon) King Bee company has been hitting about Connellville and southwestern Pennsylvania for over a year between spells when it was hitting the high seas on the buccaneer circuit. Manager Gramlich piloted his girls up and down the country, and while sometimes they didn't have much of the coin of the realm they have always been provided with three square meals a day and radiant pictures of prosperity just ahead between meals. In the end, however, Gramlich has always raised the coin to get his company moving and square up such hits to inconsequential as attachments for salaries and board bills.

GIRL IS ARRESTED.

Margaret Logue Must Now Answer Before Squire to Charges of Incontinence.

Charged with incontinence by her sister, Margaret Logue, young girl, 15, in the lockup waiting a hearing before Squire W. J. Clark this evening. The girl was arrested yesterday by Constable Joseph T. Crossland. Margaret is an orphan and has been living with her sister, Mrs. Lulu Graves, of Highland avenue. Mrs. Graves alleges that her sister insists upon walking the streets and keeping unsightly houses. Mrs. Graves has gone to send the girl to the reform school in the hopes of mending her ways.

Funeral for Son and Husband. SHARON, Jan. 9.—(Special.)—Within a few hours after the death of Mrs. J. Fitzgerald, which occurred at her son's residence, her husband died. A double funeral will be held Saturday.

Treasurer Settles. BEAVER, Pa., Jan. 9.—(Special.)—Frederick P. Burr, former Treasurer of Ambridge, has made arrangements to pay an alleged deficit of \$8,000 charged against him.

Havemeyer Leaves \$20,000,000. NEW YORK, Jan. 9.—(Special.)—Only family members were remembered in Henry O. Havemeyer's will. The estimated value of the estate is \$20,000,000.

Wreck Reported at Chicago. CHICAGO, Jan. 9.—(Special.)—One man is reported killed and scores injured in a crash on the Chicago, Milwaukee & St. Paul railroad here today.

Dare Inquest Postponed. The Dare mine inquest scheduled to be held at Stratton this afternoon has been postponed for a week or so to permit the experts to prepare their report on the examination of the mine.

VETERAN ODD FELLOW.

Charles Cheney Dies at Grove City, Pa. Home. DAWSON, Jan. 9.—Charles Cheney, aged 73 years, a former resident of this section, died Tuesday at the Odd Fellows' Home at Grove City, Pa. The body was brought to Dawson on Wednesday over the Baltimore & Ohio and was taken in charge by Undertaker William H. Parkhill. The funeral was held this morning at 10 o'clock, from the M. E. church, Vanderbilt. The Order of Odd Fellows having charge. Mr. Cheney was one of the oldest members of the order, having a charter number. He was well known in this section, having lived in and around East Liberty and Vanderbilt nearly all his life. He was born at Grinstead, Pa. His wife died a number of years ago. Two sons survive him, George of Mt. Vernon, O., and Charles of Columbus, O.

THE SLEIGHING FINE.

Speeders Were Out in Force Yesterday and Today.

LIVELY BRUSHES PULLED OFF In and Out Pittsburgh Street by the Nags That Can Step Some—Some of the Horses That Were Out Ahead of the Cutters.

The speeders were out in force yesterday afternoon and last evening, taking advantage of the sleighing. The weather, however, was good. Some good time was made and a riding race was quickly pulled off on both the South Side and North Side. John Smith, the horse which has the reputation of fast stepping, was exercised several hours yesterday afternoon by Stewart Hager. When John Smith was let out he demonstrated that there is lots of speed pinned up in his little body. He was ridden by Sam McCormick, but the black horse with his horse, Lone Star, giving him considerable exercise to the South Side.

Dr. H. C. Hoffman and Dr. F. A. Whitman, their nags and a small amount of a crowd of boys to mix of those on the streets. A J. Cochran of Dawson was in a double sleigh driven by Admiral Schuyler and Black Beauty, both of which horses are annually entered at the Dawson driving park.

Although Charles Slew, driven by J. E. Sims and J. J. E. Sims, may not be the fastest horse in town, he took those gentlemen at a good gallop. The feature of the procession was the two handsome grey geldings of Mr. Sims. Both are magnificent specimens, each being made of 21 ribs. One is a bright golden color. The other is made from the hides of gray horses.

William Grottel and Miss Sarah Hettel joined in the parade of sleighs along the streets. Mrs. Herbert Knox and daughter were also out, as was Miss Bessie Kate Dull of the Arlington Hotel.

Councilman D. F. Hild and his Billy Scott show a clean pair of heels to most of the other jockeys, and Billy did his work well. As ladies' Dave had John Beck, manager of the Smith House, about to steady up one side of his trim cutter.

David Long was out in the afternoon with his horse, which makes some pretensions to speed. Dave got all out of Black Beauty there was to get. Lots of physicians were out during the afternoon, some for professional business and others from the sheer pleasure derived from driving. Dr. L. P. McCormick, Dr. J. J. Coll, Dr. L. P. Richard and Dr. Mrs. L. B. E. were seen at different intervals.

Likewise was Dr. J. C. McClelland, skimming over the beam like a hawk, and of speed on the good running places.

R. M. Hunt and brother, Elwood V. Hunt, had Denmark out in the afternoon for the speed trials. Denmark showed up strong at the finish. Arthur McClelland of Dunbar was also in town today. Other, too numerous to mention, made their appearance.

A party of nurses from the hospital drove about town in a big sled, the front being followed by Liverman J. L. Evans.

There were many other cutters out both in Connellville and New Haven among them being S. M. Goodman, Bateman Newsom and H. M. Keenhart.

No New Patients. No new patients have been admitted to the Cottage State Hospital since Tuesday.

Warmer Weather. Fair tonight and Friday, warmer Friday is the noon weather forecast.

EXPERT OPINIONS

Given Operators of Coal Mines at Meeting Held at Washington Hotel Yesterday.

WASHINGTON, Jan. 9.—To consider means for preventing the coal mine disasters, such as have shocked the country during the past few months, was the object of a meeting of operators from the West-Virginia and Pittsburgh fields held here yesterday. The meeting was held at the New Willard Hotel and was addressed by experts of geological surveys and by geologists who have given the subject of mine safety great study.

The West Virginia operators were the operators of this meeting and they invited operators from other districts to participate. It was decided to form an organization of West Virginia coal men and William N. Page of Washington was chosen chairman and Neil Robinson of Charleston, W. Va., secretary. Today a permanent organization will be effected. It is expected that Pennsylvania and other States will form like organizations and that all will work in harmony to the common end.

Committees are to be appointed for research, investigation and dissemination of information and they will co-operate with the officials of the geological survey and other technical departments of the government. It developed at the meeting here that the operators are entirely in the dark as to the cause of mine accidents.

ARRESTED GOING TO FUNERAL

Girl Charges Breach of Promise and Asks \$3,000 Damages. WASHINGTON, Pa., Jan. 8.—(Special.)—While on his way to attend the funeral of his father yesterday, H. L. Hepler of Buffalo, N. Y., was arrested by Deputy Sheriff U. G. Latton on a charge of breach of promise. A writ of habeas corpus was issued by Judge E. H. Moore of Washington. The young woman contends that Hepler, who formerly resided at West Middletown, this county, had promised to marry her sister of 16 years ago, but after the wedding date had been set.

Hepler's father died in West Middletown on Tuesday, and he reached here yesterday morning on his way to his father's home. Relatives furnished him with \$1,000, enabling him to attend the funeral. Hepler declares the engagement was broken by mutual consent.

PLAYING SOLDIER.

Crazy Italian Picked Up by the Police Last Night.

A crazy Italian with an unimpaired mind was arrested last evening by Chief Butler and Officer Anderson and placed in the hospital. The foreigner was playing soldier with a pick handle when he first came to the officers' notice. He carried one arm loaded with a number of small stones and several different maneuvers and marches had been accomplished. The man had been nervous and fearful trouble, the policeman placed him under arrest. To Dunbar Solomon the man said that he was from New Haven but later gave his residence as "Middletown" and he further investigation of his matter.

One drunk of the ordinary variety was given 15 hours by the Burgers this morning.

AGAIN APPEARS.

Eat-Bite Tibbs Once More in the Limelight of Publicity.

UNIONTOWN, Jan. 9.—Eat-Bite Tibbs, a negro sent to the Western Penitentiary from Fayette county, who has peculiar propensities for biting into point, is again in the limelight.

Tibbs has sent to Sheriff Johns samples of a bolt he has invented. The bolt is so angled that nuts, placed on either end, cannot be removed unless a "T" is taken out. Sheriff Johns is showing the device to his friends. It is considered decidedly unique.

MIDNIGHT CONFERENCE

At White House Reported Over Railroad Coal Ownership.

LONDON, Jan. 9.—(Special.)—The Manchester Guardian's New York correspondent tells in this morning's issue of a midnight conference held at the White House between President Roosevelt and the heads of four coal mining railroads, to discuss the law enforcing such lines to dispose of the mines.

The Guardian asserts that the bill will be introduced in the present Congress.

Lang Named Safety Director. PITTSBURGH, Jan. 9.—(Special.)—Edward G. Lang, was appointed director of the Public Safety Department today.

NEW OFFICERS

Of the L. C. B. A. Were Installed Last Night.

Installation of officers took place last evening at the regular meeting of the Ladies' Catholic Beneficial Association of the Immaculate Conception church held in the L. C. B. A. hall in the Solson building. The new officers for the year are as follows:

President, Miss Rose Dougan; First Vice President, Mrs. P. J. Torrey; Second Vice President, Mrs. Mary Connelley; Recording Secretary, Mrs. Katherine Connelley; Assistant Recording Secretary, Miss Willie Harrigan; Financial Secretary, Mrs. Jennie Quinn; Treasurer, Mrs. James O'Hara; Marshal, Miss Ella Connelley; Guard, Mrs. Mary O'Hara; Trustees, Mrs. B. O'Connell, Mrs. Julia See and Mrs. Joseph Tippman. The officers were installed by Past President Mrs. E. J. Harrigan.

VETERANS BANQUET.

Thirteen G. A. R. Men Sit Down to Yough House Dinner.

ILLNESS KEPT SOME AWAY Business Meeting of Wm. F. Kurtz Post No. 104 Preceded the Dinner When Officers for the Ensuing Year Were Installed.

The attendance at the G. A. R. meeting last night was small on account of the inclement weather and a number of the members being ill. The program was somewhat changed from the original plan and the meeting was held prior to the dinner. The officers, with the exception of three, were all installed, and after a donation of \$7 had been voted a worthy couple of veterans returned to the Yough House, and at 7:30 sat down to the table in parlors of the things prepared by Proprietor James McGinnis.

After all were seated and the roll called the number present was not even 13. One of the party was unwell and went out to get another man. He failed, however, and was content with one of the comrades. Another that the number 13 was not an unlucky number; that the American flag had originally 13 stripes and 13 stars; that the nation was built on 13 States; that the flag was still waving in triumph and there was no visible evidence that the nation was going to rock.

One of the comrades spoke of Congressman Allen E. Cooper in glowing terms as being one of the best friends the veterans had.

A matter was taken up in reference to a comrade of the Civil War who was wounded in the service and for a long while back has been totally blind. This comrade is receiving but a meagre pension and an effort will be made to have his pension increased.

Following was the address of the comrade present, Lloyd Johnston, Frank Miller, A. J. Cunningham, Clark Collins, R. M. Smith, J. R. Bailey, Henry Kurtz, Bernard Keenan, J. J. Bannard, Jacob Morgan Smith, Dawson and John N. Boyd.

DR. BELL'S GUESTS.

Members of the Yough Medical Social Club Entertained by Him at Dawson Last Night.

The Yough Medical Social Club was royally entertained last evening by Dr. H. J. Bell at his home in Dawson. The meeting was the regular monthly one and the attendance was fairly good.

Dr. Bell's patient was the subject of an interesting paper read by Dr. W. L. Bailey. Dr. Bell is a disease of the eye, which in many cases results in loss of sight. It is brought into this country by foreigners who escape quarantine detention and as a result the disease is spread in America. The disease was fully discussed by Dr. Bailey.

Following the business session a charmingly appointed luncheon was served. The guests of the club were Dr. J. L. Cochran of Star Junction and Dr. Hall of Vanderhill. The next meeting will be the annual banquet and will be held early in February. The place of meeting and date has not yet been fixed.

Pearless Fires 32 Ovens. The Carolina plant of the Peoples-Congohite Coke Co. at Alverton is now in blast, the entire 32 ovens having been fired a week ago. The railroad connection was made on Tuesday and on the first coke was shipped. Three cars were placed on the track Wednesday and these were taken out today.

NATIONAL GLASS BRICK CO. TO ERECT A LARGE FACTORY.

Experimental Tests on Johnston-Gallagher Farm Prove Very Successful and Brick Already in Demand.

BEARS IN BAD HUMOR.

Jingle of Sleigh Bells Grates on Teddy's Ears.

The jingle of sleigh bells on Pittsburg street seem to jar on the temperaments of two performing bears at Maple Land this week. For two nights past they have been in their temper in humor during the evening performances. On Tuesday evening they toppled over their paraphernalia during the act and last night they were also bad.

Elizabeth Carro, a 14-year-old girl, who puts the bears through their act, has had her hands full but she goes about her work as fearlessly as though the bears were good-natured Newfoundland dogs.

WORKS RESUME.

More Optimistic Tone Is Beginning to Prevail Throughout the Coke Region.

Business on the Pittsburgh & Lake Erie is just picking up a pace, following several weeks of exceeding dullness. Evidences are that a resumption of the coke traffic is to be expected. Orders have been issued to move as many coaches as possible at the Summit in order to accommodate the increasing coke traffic.

At the Dickerson Run scales last night there were 130 loads weighed. This is the greatest number of cars that have gone over the scales for weeks. Since the recent industrial depression the nightly average has been five or six.

This morning the Runco works of the H. C. Fickel Coke Company fired 150 ovens. At Edinboro 40 additional ovens went in blast this morning running the total up to 210. It is stated on reliable authority that several other plants will resume operations between now and February 1.

SEWICKLEY VEIN.

Efforts Being Made to Give This Most Valuable Seam of Fine Steam Coal.

UNIONTOWN, Jan. 9.—An important meeting of coal and coke operators will be held in the hotel house here February 1 for the purpose of creating a sentiment in favor of the protection of the Sewickley vein of coal, considered very valuable by those who have made an investigation into its merits.

The Sewickley vein lies from 50 to 100 feet above the Pittsburgh seam and is from five to six feet thick. It possesses excellent steaming qualities and makes a high grade coke.

Efforts will be made to have operations along the Pittsburgh seam more carefully in order to prevent the surface from falling in, thus reducing the cost of developing the Sewickley vein. It is estimated that there are 500,000 acres of this coal in this and adjoining counties. R. D. Fulton is the prime mover in the matter.

JAPS PREPARING

For War and May Strike Any Moment Declares Maxim, the Great Arms Inventor.

United Press Telegrams. WASHINGTON, Jan. 9.—Japan is making preparations for war and may strike us any moment. Such is the declaration made today by Baron Maxim, the famous arms and explosives inventor.

It is the old Japanese game of rushing war preparations while crying about poverty, Maxim says.

Cyphers Acting Burglar. Owlen, Pa. Bureau G. A. Markle of New Haven being out for a time, Edgar Cyphers, President of Council, is acting as burglar. This morning from common drinks were given a hearing. The men were arrested yesterday by Policeman Joseph O'Brien.

Nolle Pross Entered. PITTSBURGH, Jan. 9.—(Special.)—The suit of Lewis Emery, Jr., against Homer Castle, an action for damages, was nolle prossed today.

Janison For Senator. It is rumored at Greensburg that John M. Janison will be a candidate for State Senator.

WHAT IS CLAIMED FOR BRICK

C. B. Lawton Discusses Its Qualities and Advantages—Company Has Ten Acres of Ground Upon Which to Erect Their Plant.

Past the experimental stage and up to a point where it is recognized by architects, engineers and builders of all kinds, the glass brick is one of the most wonderful discoveries of the age, and one that is destined to make Connellville more famous and its inventor a fortune. The National Glass Brick Co., which has an experimental factory on the Johnston-Gallagher farm near Trotter, promises to be one of the great industries of the coke region. Charles B. Lawton of Pittsburg is the inventor of the glass brick, and he spent many years in perfecting his invention. The company is composed of J. N. M. Shiner, President, Philadelphia; He is also a Director in the Dunbar Furnace Company; Reginald Palmer, Treasurer, Dunbar; Charles B. Lawton, Secretary, Pittsburg; and the following Directors: E. M. Hukill, Pittsburg; and E. E. Palmer, Pittsburg.

The company was induced to locate on the Johnston-Gallagher farm through the solicitation of the Baltimore & Ohio Railroad Company, represented by G. W. Dunderberg, through whom 10 acres of the ground were secured, and also for the reason that the sand needed in the manufacture of the brick can be secured very cheaply at Dunbar and conveyed at low cost to the works.

In locating the plant on the tract the members of the company also took into consideration the transportation facilities. The B. & O. tracks bound the east line, the P. & E. tracks are on the west, and deliveries by the P. & E. are made on the P. & E. tracks, affording the very best shipping facilities.

Another reason that caused the company to choose its location here was the idea that in the territory hundreds of boys and girls could be secured for the plant, to work in the packing and decorating departments. These departments alone will give work to hundreds when the company has its details completed and the factory running, and here, according to the belief of Mr. Lawton, the inventor, was a rare opportunity to secure the need of labor. Besides studying the secret of making glass bricks, Mr. Lawton has also studied the social problems of the day and he is the only one convinced that children of foreign parents are not following in the footsteps of their fathers, and becoming coke workers and miners. He says the majority of them are endeavoring to leave the beaten path.

Glass brick has always been a dream with architects, but as close as they ever approached was the manufacture of cranberry brick. Mr. Lawton has spent many years in perfecting his brick, first embodying his idea in a mold from which a brick of lead was cast as a study, and from this modest beginning a mold was perfected that made the first glass brick from glass that was broken from the McElroy-Kearns factory at Charleroi at night after the works had closed. Eleven bricks were cast the first night, of which four remained free of cracks after being annealed. At high each brick cost the inventor \$1. He considered it a good beginning. On the casting of the last brick the mold broke and was succeeded by a model which is now being used to turn out the finished brick that are on display in the company's building, and which have been examined and pronounced perfect by hundreds of brick experts.

The inventor was spurred on by the encouragement given him and was assured that if he could make bricks on a commercial basis he would have an unlimited field that would require an immense factory.

Bricks on a commercial basis meant pure white or colored bricks of uniform shade sufficiently low in price as to compete with marble and granite, and of sufficient quality to withstand a atmospheric changes, besides being able to stand in enormous crushing weight. The inventor made an exhaustive study of the strength of glass and was delighted to learn that glass possessed a crushing strength three times greater than that of granite, 10 times that of concrete, 25 times that of rubble masonry, 10 times that of brick, six to eight times that of sandstone and four to five times that of limestone. Then he began to think of the possibilities.

FACTS AND THEORIES.

MINE INVESTIGATIONS.

The inquiry into the Monongah mine disaster has thus far developed some fact and much theory. The fact is that the mine was permitted to be opened by the state when it is given by experts. Even then it is of a negative and uncertain value, and if contradictory, it is of a value at all.

The jury of inquest should strive earnestly for the facts. It has been asserted that the mine was gaseous in spite of many statements to the contrary. There should be the fullest inquiry on this point, not alone as a matter of judicial procedure, but also as a matter of affecting other inquiries of a similar nature and as useful information to the great work of guarding against future calamities of the same kind.

There will be no lack of investigation. There will be investigations by Congress and the Legislature as well as by inquests, and there will perhaps be no lack of legislation designed to prevent mine accidents. It is important that the inquiries should be conducted fairly and intelligently not so much for the purpose of convicting anybody of responsibility for these disasters as for learning how to prevent them hereafter.

What is necessary to be done in this line should be required by law. There should be no vexatious or punitive legislation to react upon the people and possibly upon the miners.

WHY PEOPLE

READ ADVERTISEMENTS.

The modern advertisement is read by the public because the reading is interesting and profitable to buyers. The old fashioned advertisement was not read for converse reasons.

One wise buyer seeks the best goods at the least price. Without the newspaper advertisement, he would be a tedious and tiresome process to ascertain just where the bargains are to be had. It would involve a personal visit to the various mercantile establishments and a detailed inspection of the stocks of each. The newspaper advertisement of to-day affords the shopper an opportunity to sit down in the evening and ascertain from his or her favorite local journal the most desirable offerings of the day, so that shopping may be done at the least possible expenditure of time and patience.

The old time advertisement was on the order of the foolish fence and barn decorations. It presented the name and the business of the dealer and required the buyer to hunt out the balance of his information himself. Such advertisements were monotonous and uninteresting. They offered no new ideas. They became too familiar to attract attention. Their publicity was negative and colorless. They were a waste of space and money.

It has been demonstrated again and again that there is no publicity so cheap and effective as newspaper advertisement if properly handled. It is hardly necessary to remind live Connelville merchants of this fact. They have proved it to their entire satisfaction. Their less enterprising should profit by the experience of their intelligent neighbors.

It may not be out of place, in this connection, to say that The Courier offers the merchants of Connelville and vicinity more publicity for less money than they can buy anywhere else.

LOCAL OPTION

IN TAXATION.

The Johnstown Democrat does not share our belief that the planing in equity of the present assessment system would be wholly or partially cured by amending the tax law and making it conform more closely to the custom of assessing property at less than its actual value, and asks us for our views on local option in taxation.

We have heard a great deal about local option in the past and in the present, and we expect to hear more about it in the future, but we had never heard it applied to taxation. The reference, however, is more interesting than the application. Briefly, it means the right of the citizens of every county to vote every four years on the Single Tax proposition and to adopt or reject it during such periods.

Local Option and Single Tax go pretty well together. It is hard to tell which contains the least common sense. They are a good pair of well meant but ill conceived propositions which are calculated to make worse the ills they seek to remedy.

We don't believe there would be any particular harm in voting on the single Tax proposition since we feel sure it would be voted down with great unanimity and certainty.

The Single Tax theory is quite beautiful in its utopian. It is also quite impracticable and quite impracticable. Its application would cause the final grumblers to groan up and the squatters on land values to rise up and it would also lose the land poor, poor farmers of Chesnut Ridge their humble and more or less happy homes.

We are much doubt the wisdom of local option in and out of Taxation.

CLEVELAND'S THRUST AT BRYAN.

Our country needs conservatism, temperation from nervous prostration, reinstatement of constitutional observance buoyant but none the less safe and prudent Americanism, scrupulous care of every person and every interest entitled to care and a square deal that means exact and honest equality before the law and under constitutional guaranty. It is the way Uncle Grover Cleveland plants the Square Blow right in the face of Colonel William Jennings Bryan.

It is the defiance of the Ancient Democracy to the Modern Cult. It was trumpeted at a Jackson dinner and sounds Jacksonian. Old Hickory had nothing in common with it and no compromise, but on the contrary, his administration was saturated with the Big Stick.

It is evident that the Safe and Sound will not permit the wild and woolly and way off Bryan to sit undisturbed upon the Democratic throne and still further pervert the Democratic faith.

AN ARTLESS DODGER'S AWFUL FINISH.

The Uniontown Herald is trying to convey the impression that its circulation is greater than that of any other Fayette county daily newspaper, but persistently refuses to have the matter investigated.

In the beginning of the controversy over this question, The Herald proposed that the matter of our respective circulations be referred to the advertising manager of the advertisers most largely represented in the columns of both papers, which proposition we promptly accepted, have since repeated every week and again and again, but which The Herald has persistently ignored, contending itself with hurling at us the unadorned and unconvincing epithet "Liar".

If the public concludes that The Herald is a bluffing, blackguarding blarney it will be no fault of ours.

Captain Richmond P. Hobson, advocate of the publication by the Government of an official journal now has an official journal now. It is called the Congressional Record and it is published by the Government. It is published by the Government. It is published by the Government.

There are still some highly suspicious people who think that President Roosevelt is playing a deep dark game for a third term. People who in no way go in for the world cannot be accused themselves.

The disloyal Uniontown Herald has elected itself the leader of Fayette county journalism but it staked the bait box.

The Somerset county court house is suspected of being a club house.

The Glass Blk is not a gold block.

The Western railroads are selling second mortgage bonds of 1,000 good for \$100,000 and 2,000 miles good only to the person to whom issued. It is difficult to understand upon what reasonable cult of business the railroad companies improve a little conditions upon wholesale contracts.

Teddy is going to contest with Taft for the title of Great American. Presumably after he has William Howard and the Mal factors of Wealth of his hands.

A Butler county justice had adopted the Big Stick policy as a cure for drunkenness and reports it to be very effective.

There is no use worrying about the local telephone rate. If there is such a thing it will discover itself soon enough.

It is old fashioned winter for sure.

One may be an accessory before the fact of the offense of truancy but the position is not desirable from any point of view.

Sheriff Johns is sweeping clean and will keep things sweet.

The telephone companies do a great many things which are perhaps but which the Bell company has against the Western Bell company. It is against the higher law.

Even the Jews are accused of employing Dissemulators of Information.

An old gun is often a concealed weapon and sometimes not very accurate being a deadly one specially in the hands of reckless youth. Child hater's scheme against it is timely.

Steel is stable.

District Attorney Henderson declines in strict disposition to mislead the public in all their dealings and to render the people of Fayette county the most effective service such public servants the people ought to honor.

The Grand Army veterans of Connelville last night renewed their allegiance to Old Glory and revived the memories of its gallant defense.

B & O run more than 100 freight trains a day but they are less profitable.

It is stated that it costs Harry Thaw \$300,000 a year to being tried for murder. Pittsburghers pay the top prices for everything in New York including justice.

Vesuvius has taken a tumble into the sea. The scientists say there is no danger. Possibly it is so long as Vesuvius doesn't tumble out of itself.

The public is invited to consultation with the physicians of Fayette county at their next meeting. This is a decided improvement. Doctors seldom consult their patients about anything but the bill.

The South Side burlap who was seized by a woman in a hat and a handkerchief but we are inclined to think that it was a huckster with a lively appreciation of the dangers of local year.

South America—I give you the great welcome. South America is greatly impressed with our fleet and will extend a royal welcome at the various stopping places.—News Item.

EXCHANGE ETCHINGS.

The Uniontown Standard has it that the city of Connelville is not so hot as it is cracked up to be. It is not so hot as it is cracked up to be. It is not so hot as it is cracked up to be.

The Johnstown Democrat issues a statement that it never had much to do with the city of Connelville. It never had much to do with the city of Connelville. It never had much to do with the city of Connelville.

The Morgantown New Dominion says that the city of Connelville is not so hot as it is cracked up to be. It is not so hot as it is cracked up to be. It is not so hot as it is cracked up to be.

TRUANCY TROUBLES.

Scottdale Officer Has Difficulties in Upper Tyrone Township.

HE ARRESTED ONE PARENT.

Two Places in Mill Town Were Endangered by Fire—Young People Taking Advantage of Shut Down

SCOTSDALE, Jan. 8.—Truant Officer James Whitson of Upper Tyrone township is having his troubles now and incidentally is giving the people who encourage truancy a taste of some of the difficulties they will encounter in evading or neglecting to comply with the compulsory educational laws. With William Dill of Broad Ford he had some difficulty in that locality if truants being reported in one day by the School Board. When Whitson went to see Dill about his children failing to be in school Dill is alleged to have used very abusive language and threatened to assault him. The officer immediately went before Justice of the Peace John C. Brownfield and made an information against Dill, and the latter was given a hearing on Wednesday. Dill pleaded guilty and seemed to regret his action to such an extent that the Justice after giving a severe reprimand allowed him to go with the minimum fine of \$2. The Board of Education of Upper Tyrone is determined to keep up the school attendance, as under the newly amended attendance laws to fall below 90 per cent in attendance means a danger of losing the State appropriation.

George Miller, a well known newspaper man of Irwin, was calling on friends and transacting business in town on Wednesday.

Charles McMillan of Brownsville is visiting his parents Mr. and Mrs. B. McMillan.

Constable George Miller of Indian Head drove down from the mountains on Wednesday to make some returns of writs to Justice of the Peace J. C. Brownfield.

Mr. Miller says that the snow is very deep in the mountains. The horse of Principal Edgar Reed of the Scottdale schools narrowly escaped destruction through the spark from a match Tuesday. Prof. Reed, lighted a match and noticed that it struck with the sparking and disturbance which sometimes accompanies some matches. Later he smoked and saw that a couch cover was blazing. A spark had fallen upon it, setting it on fire, and the fire had communicated to the cushion of the couch. The fire was extinguished by the application of a few buckets of water. Had the family left the room the place might have been burned.

The alarm of fire on Wednesday evening at 8 o'clock was caused by a chimney fire at the home of Nicholas Becker in Brownstown. The fire department responded and the place escaped without damage.

There was a continuance of the good old winter three on Wednesday afternoon and evening, and many sleighing parties were out enjoying the good roads. This is the season when the horses get all that is coming to them and then some, dragging sleighs and sleds aound.

The bowling team of Greensburg will play the Peerless team on the Peerless alleys Scottde tonight.

The V. C. T. U. prayer meeting this afternoon at 3 o'clock will be held in the United Brethren church under the leadership of Mrs. A. J. Keister and the topic of prayer will be "Missions Home and Foreign." The Friday afternoon prayer meeting will be at the First Methodist Episcopal church and Mrs. James P. Sticker will be the

leader. The topic will be "Temporance and Social Cause."

Theodore L. Keister, proprietor of the new Scottdale Home on a visit to the County Capitol on Wednesday.

Miss Dolores Rager spent Sunday with her grandparents, Mr. and Mrs. John Fair of Irwin.

Mine Inspector Alex. McCannagh went to the Dart mines on Tuesday where with other of the Mine Inspectors a final inspection of the mine was made.

The shutting down of the various industries throughout the vicinity has not injured the Peterson Business College which has just started in the winter term but instead seems to have somewhat of an improving effect since many of the young people are taking the season of enforced idleness as an opportunity to further perfect themselves so that they will be in a better position to go ahead when they do go back to work. It is an excellent time for any young man or woman to improve themselves just now.

M. B. Porter of Scottdale and Al Williams of Rostraver township were in Greensburg on Wednesday where Mr. Williams made inquiries about \$11 worth of sheep claims that he had filed some time ago. The controller's office informed him that no funds were on hand for the payment of sheep claims so that a wait will ensue until taxes are received to replenish this part of the strong box.

Miss Maud A. Loucks Principal of the Chestnut street school building, is off duty suffering with a severe attack of grip.

Look Closely At These Shoes

and then you will be quite satisfied that twice as much as our asking price will not buy their equal elsewhere.

Made upon specially designed lasts these shoes are exact duplicates of the best models produced in the center of fashion. They are extremely stylish, but they are just as comfortable as they are stylish—quite the way you think shoes ought to be.

JOHN IRWIN.

The Home Paper

Give you the real thing matter in which you have the richest interest—the home news. Its every issue will prove a welcome visitor to every member of the family. It could be your list of new year and periodic subscriptions.

THE NEW SOISSON THEATRE

LEONE WILLIAMS, CHAS. HAWKINS, WILLOS BROWN,

ADA LEWIS, EDITH COOK, LAURA HILL AND OTHERS.

MATINEE: 10, 25, 35c.

EVENING: 25, 35, 50, 75c.

NOTE: See small hand bills for statement of Grand Lodge of Masons Pennsylvania about this Company.

Seats at Box Office of Theatre.

Both Phones.

NATIONAL GLASS BRICK COMPANY.

(Continued from First Page.)

can be used to learn if the brick could be manufactured on a commercial scale, and this resulted in the establishment of an experimental plant on September 1. Scarcely had this plant been completed until one of the leading railroads of the country sent an order for the brick, which is now on file with many others in the company's office. The inventor nor the company did not know that the brick had ever been ordered, but he later learned that it passed through all chemical and engineering departments and was pronounced perfect. The commercial basis had been reached. The glass brick prices are based upon the schedule of prices for unglazed brick. A recent demonstration was made in the manufacture of the glass brick for the benefit of the officials and stockholders of the company.

Mr. Lawton yesterday afternoon discussed the merits of the glass brick with a representative of The Courier, who inquired as to its advantages and possibilities. He said:

"Every user of enameled brick knows that its weakness lies in the fact of its crazing, principally. You need only look at your mantel front to see thousands of fine cracks or crazes, which are the same as all glazed brick or tile, owing to the two materials used, clay and glass. A rise in the temperature expands these, but not equally, hence a crack occurs. The same result is found in lowering temperature. In time the glass is filled with cracks and sometimes they are known to leave each other altogether. Many other instances are common where the coloring in the clay finds its way through the cracks in the glass surface and stains the surface into undesirable shades. Glass brick will not do this. It will be a perfect and crackless brick, where there is a wall till Gabriel blows his trumpet, and may then echo back the blast to him in that far away time. You think that is hardly to be expected. I tell you when the ruins of Pompeii were dug up after many centuries of covering their foundations in an old glass factory as fresh as the day the old mountain belched forth and history related the story of the sharp cracks that worked on the sides of the excavators. Come with me to a former farm house. It has been standing over 75 years. During that period the storms have many times blown the chimney down. The roof and porches have often been blown about, the trees have been torn up by their roots and cows have been blown into neighboring fields, but that pane of glass, of about one-sixteenth of an inch in thickness has defied all the storms and today is as good and as strong as the day it left the factory. Glass is one of the few things that will stand."

"This brick, when set up and its opening poured with cement, will make the strongest wall on earth. This cement gets harder with age and glass does not. I am told by one of the best living engineers that these bricks can be made as strong as concrete with ordinary finish bricks. This is in the future. We ought to be satisfied to sell as cheap as enameled brick for the present. A brick 10 times as good for the same money is good enough to start with."

"How do you know they will sell?"

"The largest buyer in the world says, 'Get your stock ready so we can place an order with you.'"

"A group of engineers and architects have said we are ready to specify as soon as you are ready to deliver, and every professional man in the engineering and architectural line that he knows these bricks to be willing to give us a written opinion on glass brick if we want it."

"How will hard times affect your trade?"

"It is common knowledge that more brick building is done in tight times than in periods of great expansion. During the hard times succeeding 1893 I had all kinds of money to loan at 4 to 6 per cent, and since good times arrived rates are prohibitive for building purposes."

"If your bricks are exposed to extremes of temperature with the cement filling, won't there be some breaking going on?"

"I forgot to say, before I had our stock made I had a brick built with cement filling and submitted it to a testing laboratory, who tested it severely from 150 Fahrenheit above zero to 20 degrees Fahrenheit below zero. They witnessed the extremes perfectly. I'm glad you thought of that."

"What do you claim is the greatest use for your brick?"

"Well, all finish surfaces below ground is probably where we stand out the best. Under all dampness is to be figured with. When an extra day season is on or a flood comes like those Pittsburgh gets annually, all surfaces, no matter how pretty finished, are spoiled except glass brick. Just wipe the wall with a cloth and it is as pretty as ever with no damage done. For this reason basements, tunnels, cellars and sub-basements are our chiefest claims of superiority. Yet it must be admitted that surfaces where sanitary effects and beauty combined are sought, we expect a large market, because of the permanency of the surface, and there being no mortar joints. The surface presented is a glass. This keeps its freshness and gloss in face intact, there being no exposure

ed joints to become loose and gradually leave its place, which makes the appearance of the wall ugly as well as protecting an opening for insect life."

"Do you see where the chip was broken? It does not show, does it? That is because the glass is the same color all the way through, and when the chip was knocked off it left a glassy surface as before. You cannot do this with other marble or enameled brick. The chip of the former will invite the dust and hold it and in the latter you will see the clay beneath the coating of glass removed."

"It is possible to make any color of brick desired, from bright red to green, and in addition to this it is also possible to manufacture brick with decorations so closely resembling marble and granite that it is hard to detect the imitation at close range."

The company contemplates the erection of a plant of varied colored brick between the layers. The cement is within the brick, and the mold is so constructed that each is interlocked and held firmly in place. The brick has already been patented, and the inventor takes especially good care not to divulge any portion of the ingredients that enters into its manufacture nor the devices through which it passes to perfection."

The laying of the brick is very easy and no experienced hand will be required. All that is necessary is to get a straight line and keep on laying the brick, pouring in the cement which securely ties one to the other. The bricks fit one on top of the other and no cement nor mortar is placed between the layers. The cement is within the brick, and the mold is so constructed that each is interlocked and held firmly in place. The brick has already been patented, and the inventor takes especially good care not to divulge any portion of the ingredients that enters into its manufacture nor the devices through which it passes to perfection."

NEW TUNNEL OPENED.

Solution of New York's Rapid Transit Problem Is Well Under Way.

TO BROOKLYN IN FIVE MINUTES

New Safety Devices Enable One Man to Control Movements of All Trains in Tubes—Can Stop One or All in Case of Accident.

New York, Jan. 8.—The first of the series of tunnels under the waters that divide Manhattan from Brooklyn on the one side and from New Jersey on the other was opened for traffic late last night when the initial passenger train left the Bowling Green station of the Interborough subway, ran down the inclined tracks to the Battery, far below the surface of East river, and through the length of one of the long steel double tubes which parallel each other under the river to Brooklyn.

The opening of this tunnel, which is in effect the extending of the present subway system to Brooklyn, is regarded as a long step toward the solution of the transportation problem of New York—one that brings New York and Brooklyn closer together and gives an outlet to Manhattan's millions in bringing the comparatively thinly populated territory of Long Island within easy reach of the center of business.

The opening of the Battery tunnel will serve to relieve to some extent the Brooklyn bridge crush by deflecting thousands from the human tide that rushes each day in and out of the tunnel entrance of that big structure. No official ceremonies marked the opening of the tunnel. A West Farms express train plucked up a crowd of Brooklynites eager to make the first trip, and then darted away through the brightly lighted tube to Brooklyn, where it stopped at the borough hall station, the present terminus of the line in Brooklyn. Later the Brooklyn section will be completed to the Flatbush station of the Long Island railroad, thus affording connection with all points on Long Island. The trip from old city hall, Manhattan, to Borough hall, Brooklyn, will be covered in about five minutes when the schedules are in working order.

The Battery tunnel is equipped with a series of unique safety devices designed to make traffic under the East river absolutely safe. Experts believe that these inventions, which are on trial for the first time, will revolutionize the movement of traffic in subways and at the same time preclude the possibility of serious accidents. One man will be complete master of the tunnel at all times, with the aid of an illuminated electric diagram, which will show the movements of trains. While train crews will not take orders from him, it will be within his power to stop any or all trains within the tunnel by touching a button, and in the same way he will be able to shut off the currents and control the movement of any particular train. A telephone system has been installed from him, it will be within his power to stop any or all trains within the tunnel by touching a button, and in the same way he will be able to shut off the currents and control the movement of any particular train. A telephone system has been installed from him, it will be within his power to stop any or all trains within the tunnel by touching a button, and in the same way he will be able to shut off the currents and control the movement of any particular train.

NO COURT HOUSE PHONES.

The Bell Company Refuses Service to Westmoreland County.

GREENSBURG, Pa., Jan. 8.—(Special.)—Westmoreland county's new court house is practically isolated through the refusal of the Bell Telephone Company to install its service, the building being equipped with wires, switchboards, transmitters and receivers, not put in by the Bell Company.

Commissioners Reamer and Shaffer say unless the company consents to establish connection immediately, the courts will be appalled to.

BREAKS HIS RIBS.

Serious Accident to Dr. Atkinson Yesterday.

Dr. H. F. Atkinson was thrown from his sleigh near the corner of Pittsburgh street and Gibson avenue, South Conneltsville, last evening, sustaining several broken ribs. The injury is quite painful.

The horse took fright after the sleigh overturned and ran away. Mike Brill, the driver, was also thrown out, but was uninjured. Dr. Atkinson was attended by Dr. E. J. Coll and is resting easily.

Reported Railroad Deal.

WINNIPEG, Jan. 9.—(Special.)—Reports have been received here that the Canadian and Pacific railroad has completed plans to take over the Chicago & Great Western railroad. A. B. Stikney, the Great Western's president, is said to have consummated the deal.

Mills at Washington Resume. WASHINGTON, Jan. 8.—(Special.)—The Jessup steel mill, employing 100 men, resumed operations today after a shut down of several weeks. The Washington Thimble Company will resume January 15, while the Tyler tube and pipe mills will be put to operation January 20.

Ceiling is Improving. John Oellig, druggist for H. O. Kenney, of the South Side, is improving after being ill with the grip for several days past.

A HIGH ROLLER.

From Fayette County Blows His Roll in Pittsburgh.

After putting a voucher in the bank where he transacts his financial affairs on the day before Christmas, the voucher being for the securing of cash wherewith to meet a two weeks' pay for over 250 employees, Patrick Dore, of the contractor firm of Dore & Dalton of Reno, this county, evidently decided that he could use the money in a much more pleasurable way, and instead of putting it out for the purpose intended went to Pittsburgh and gave an example of burning up money that would do credit to the performances of Coat Oil Johnny.

When Dore landed in Pittsburgh on Christmas Eve he had in his pockets \$4,000.24, and of this \$3,800 was in Clearing House checks. The pace he set is readily apparent, for when located last night by Detectives Roach and Porter, he had \$69.50 in currency and the Clearing House paper. During the 21 days he was in the city Mr. Dore succeeded in getting away with over \$2,190.

In the meantime the employees of the firm, many of whom are foreigners, had a rather blue Christmas, and as a result, it is said, Mr. Dore is not a popular character in that section of the country. Mr. Dalton, his partner, stated last night that he would not attempt to take the missing one back until the employees had been appeased.

MT. PLEASANT WON

Nice Game of Basketball From the Local Y. M. C. A. Team Last Evening.

Although handicapped by the absence of their captain and best forward, Pfadt, the Mt. Pleasant Independents traveled to Conneltsville last evening and took the Y. M. C. A. team into camp by the score of 28 to 19. The playing of Pfadt at center was the particular feature of the evening, but as a whole the game was clean and well played. The Conneltsville boys, although beaten, treated the Mt. Pleasant team royally and acted as gentlemen throughout the game.

Following is the lineup of both teams: Mt. P. Independents. C. V. E. M. C. A. Nelson. Forward. Kline. Skiles. Forward. Brown. Guard. Conner. Thomas. Guard. Schindler. Bowman. Guard. J. By Substitutions. Pfadt for Skiles. Ashe for Schindler. For Brown. Goss (won foul, foul 11, Bowman 1, foul 1, King 2, Thomas 2, By 2, Ashe 2. Goss from foul, foul 2, King 2.

Goss is a former college man, and he scored 24 out of the 28 points made by Mt. Pleasant. Conneltsville has no man qualified to play center at present, and that accounts for Goss' easy time. Conneltsville scored 19 points. The locals played fairly good outside of Ashe, who has dropped a few paces since his early season's play.

WAYLAIED AND ROBBED.

Two B. & O. Men Held Up on Tuesday Night.

A daring holdup on South Pittsburgh street, within the borough limits, occurred Tuesday night when two men relieved H. B. Painter and S. E. Ordorff of their valuables at revolver points. The victims were on their way to town from South Conneltsville about midnight when the affair occurred. As they approached the corner bridge, just beyond the home of Joseph Tippin, two men leaped down the hillside and held them up. Painter resisted and was knocked down and choked.

The men succeeded in getting \$25, two pairs of gloves and a watch from Painter and a suit case containing clothing and three razors from Ordorff.

The robbers were not disguised, although the closest coat seemed to have blackened his face. The victims were not sure whether this man was a negro or a white man. The other fellow was a tall negro.

The matter was reported to the local police and two officers were stationed on the South Side to make an investigation of the matter.

OID THE D.C.

Foreigners Thought He Was Torturing His Patient.

WASHINGTON, Pa., Jan. 8.—(Special.)—Dr. James Woudell of Monaca called to attend an injured foreigner last night and commenced sawing up his wounds without administering an anesthetic.

The injured man yelled as the needle pricked him, and other foreigners, believing that their fellow countryman was being subjected to torture, poured oil on the doctor. They wielded empty bottles and chairs and seriously injured the physician, who was rescued by Chief of Police Woolsey.

Nine foreigners were arrested and fined, but Dr. Woudell today charged assault and battery against six of them, and all were sent to jail.

Proposes New \$1,000,000 Bridge. WASHINGTON, Pa., Jan. 8.—(Special.)—The program of improvements mapped out by the United States Steel Corporation calls for a steel railroad bridge over the Monongahela river between Monaca and Donora, estimated to cost \$1,000,000.

Big Minneapolis Fire. MINNEAPOLIS, Minn., Jan. 8.—(Special.)—The entire fire department has been called to the Hartman Furniture Company's warehouse. The building is a ragged furnace from the second to the seventh floor.

G. A. R. OFFICERS

Or Will F. Stewart Post Installed at Uniontown.

The annual installation of officers took place today evening at the regular meeting of William F. Stewart Post of Uniontown, held in the Citizens' title's Trust building. The new officers are as follows:

Commander, J. O. Miller; Senior Vice Commander, Levi Fennels; Junior Vice Commander, E. R. Sholder; Chaplain, C. L. Smith; Quartermaster, R. McChlain; Assistant Quartermaster, W. T. Kennedy; Adjutant, T. B. Whaley; Officer of the Day, Milton Kemp; Sergeant, D. C. Campbell; Council of Administration, D. C. Campbell, Milton Kemp and W. T. Kennedy.

You Can't Pay More Than \$15.00 for Any Suit in This Store.

This is the Style that is Correct

WHEN we say fifteen dollars for all \$20.00 and \$22.50 and \$25.00 Suits and Overcoats, and \$10.00 for those regularly priced \$15.00 to \$17.50, we mean clothes correct in every detail and style, cut, fabric and tailoring. That's why this clothing sale looms head and shoulders above all others. The lowered prices have the added prestige of absolutely correct style. Mere advertised prices have no significance beyond the reputation of the establishment that print them, and a \$25.00 suit is no bargain at \$15.00 unless the fabric and the cut of the garment is correct. It's style, correct style, that is causing the wonderful results of this clothing sale, just as much as the generous underpricing.

WHAT YOU MUST DEMAND WHEN YOU BUY A SUIT.

Insist that the coat measures at least 31 inches in length.

Insist that the collar be close-fitting.

Insist that the shoulders be hand moulded to insure a lasting shape to the garment.

We publish a picture of one of our suits, and it is the exact pictorial reproduction of what you'll find when you come here. It is correct style that makes our sale prices lower than some competitive values would be at lower printed prices.

All \$20, \$22.50 and \$25.00 Suits and Overcoats in the store at \$15.00.

These Suits and Overcoats, all in the latest styles and newest fabric. They include every remaining suit that regularly retailed at the above prices, in black, blue and all fancy mixed fabrics. The overcoats are shown in authentic styles, made of correct overcoat cloths.

This beyond question, is the greatest January sale of Men's Garments ever held in this county.

All \$15, \$16.50 and \$17.50 Suits and Overcoats in the store at \$10.00.

This group includes every remaining Suit and Overcoat in the store that was formerly priced below \$18. of black, blue and fancy Suits, in single or double breasted models.

Overcoats in black and fancy patterns, with close fitting collars and broad military shoulders. Perfect draping garments that will give long and satisfactory service, and retain their distinctive style features until you are satisfied that you've had the biggest \$10 worth you ever bought.

Wright-Metzler Company

SPECIAL WINDOW SALE!

TUESDAY, WEDNESDAY AND THURSDAY

Eton Hurlbut Highland Linen 24c a Box.

Your personality and character are often judged by your correspondence. We are not all good penmen, but neatness in writing goes a long way in the general appearance of a letter. The most important part to observe however, is always to use the right kind of stationery. Public opinion has stamped Highland Linen as the correct kind. Remember, Three Days Only at 24 Cents a Box.

GRAHAM & CO., Druggists, Pittsburg & Apple Sts. CONNELLSVILLE, PA.
